E-COMMERCE WEBSITE FOR DESSERT PRODUCTS

ABSTRACT

This project, entitled **"E-commerce Website for Dessert Products"**, is designed to optimize the online shopping experience for a domestic bakery. The website integrates essential features such as product browsing, order management, and secure payment processing to meet the diverse needs of modern customers. It ensures a seamless shopping experience by allowing customers to browse dessert items, add them to their cart, and complete secure transactions. With robust validation mechanisms to prevent duplicate entries and ensure error-free operations, the platform is scalable and user-friendly, making it ideal for bakeries of all sizes. The website empowers bakery owners to optimize resources, improve customer satisfaction, and expand their reach, serving as a comprehensive solution that enhances productivity, minimizes costs, and drives business growth in the competitive dessert industry.
